Unity + Action = Victory for Job Security in EVS

Because we are united and taking action in our strong union, we have the power to make management do the right thing. When management decided to outsource and subcontract the Medical Office Building, they notified us that there will be job losses. Management tried to violate our contract and lay off the most senior people in our department.

Because of our union contract we have protections that are clear about what management can and cannot do. We came together and filed a group grievance to cease and desist the layoff and we had our co-workers sign on to a hospital-wide petition in support of our co-workers that were being laid off saying they need to keep their jobs. When we met with management we were able to cite all the contract violations that management made. Management heard us and our actions made it so our jobs are protected!

When we fight, we win!

"I was very happy with the meeting that we had with management—it had a great outcome. Having my coworkers alongside me is great and the win was wonderful."

Lydia Zhukocskaya, EVS

"I am so grateful that we have a union. My job was saved because my co-workers and I came together and took action and prevented management from laying us off and having a job to look forward to."

Perry Johnson, EVS

"I am so happy that my co-workers and I have been finally treated fairly. By sticking together we were not laid off, and all of that is because we have a union and a strong contract."

Stephen Stout, EVS
