

We Are Voting to Take Action

We know that when it comes to our patients and our community, our voices as frontline nurses make a difference. CHI St. Elizabeth's recent corporate bottom-of-the-barrel proposals would take our hospital and community in the wrong direction. Our commitment is to make sure that patients at St. Elizabeth Hospital never experience short staffing, and that means making sure we can recruit and retain experienced staff.

We are voting to take action for wages that will recruit and retain staff, benefits that are affordable and keep our families healthy, and respect for our patients' dignity with standards that meet all patients staffing needs.

Tell CHI St. Elizabeth it's time to do better by coming to VOTE YES for taking action! Our vote and our action will make the difference.

"We are committed to our patients and our community. CHI needs to make that same commitment by investing in frontline staff, safer patient care and a way for us

to recruit and retain skilled RNs. We are voting to take action to stand up for our patients and community. Come join me to take action and vote!"

Sara Peterson, RN, Surgery
