

# Making Our Voices Heard at the Bargaining Table for a Fair Transition Agreement!

Because we have a union, we have a voice at the table to raise our concerns and protect our jobs and benefits as we transition into the UW. Our bargaining team has met with management twice and has brought to the table the priorities and values we all voted on, and although we have made some good progress, we still have important issues to resolve. Our team will continue to push for management to honor our values and respect our benefits. At this time it is critical that we all show our unity to send a clear message to management that we are all in this together.

"I encourage everyone to sign our unity petition. We are stronger in numbers. Your vote counts! It's very important to be united for what we're fighting for!"
