

United for Improvements at Island Hospital!

Bargaining Proposal Votes: December 14 and 15

We have shown up every day and every shift to care for our patients and our community through this global pandemic. We know we need improvements in staffing and wages that recruit and retain quality staff.

That's why we're voting **December 14 and 15** on the proposals that our elected bargaining team members will be taking to the negotiating table with hospital administration early next year. It's important that we all have a say in what those proposals are so that we are unified to win the improvements we need at Island Hospital.
