

We are united for a strong contract

Our bargaining team met with management on Monday for our seventh bargaining session, and we finally received an economic proposal – five months later. It was an insulting first counter proposal that would keep St. Elizabeth below market and doesn't cover the increasing cost of living in King County. Although we are far apart on wages, staffing, and safety for nurses and our community, we will continue to fight for a strong contract!

"CHI Franciscan needs to invest in us, there's no way to contain staff if you don't. The hospitals will just end up paying

temporary staff and travelers forever."

- Sara Peterson, OR

Share your staffing story and the impact it has had on patients.
