

WE'RE STANDING UNITED FOR A STRONG CONTRACT

AT ST. ANNE: **INFORMATIONAL PICKET!**

"We notified management about our informational picket on behalf of the RNs and Service members. It's been 10 months and the community needs to see what's going on." **Adil Mohamed, Sterile Processing Tech, Sterile Processing**

"I appreciate the amount of staff that came and delivered the picket notice with the bargaining team. We decided we need to picket because the nurses need to have break relief nurses, like other hospitals and both RNs and service workers need competitive wages. I hope to see many more of you on the picket line with us showing solidarity, that we all are fighting for the same things!" **Diana Baird, RN, Telemetry**

Join us on the picket line as we advocate for fair wages that enable us to support our families. We are fighting for break relief for everyone, a low census cap, and low census fund for service members, charge RN patient load limits, safety, respect, and wages that are in line with other King County healthcare workers. It's time to call on St. Anne to bargain in good faith!
