

SEH Diagnostic Imaging:

We are United and We Will Not Stand for Takeaways!

Our Diagnostic Imaging bargaining team has had three bargaining sessions with management in May. In Session 2, management proposed takeaways to benefit eligibility and pay in lieu of benefits. We have made it clear to management that we will not stand for takeaways to our contract. Everyone's voice needs to be heard: Together we are much stronger than apart!

"Management thinks it is okay to threaten our benefits. We will stay strong and fight for our rights!"
Taylor Osborne, Nuclear Medicine Technologist

Key Issues:

We have presented proposals around our key issues, with only a few responses from management. Our proposals center:

- Low census limits and protections
- Incentives to increase staffing
- Safe and up-to-date equipment
- Wages and benefits that keep us competitive in the market

We need to continue to show our unity so we can win language that addresses our priorities!

What's Next?

Sign the unity petition and share your story with management!

Sign our unity petition, and share your story about equipment at work at the form below. We want to share with management about how unsafe/outdated equipment has impacted your working conditions (low census, patient care, productivity, etc.) at St. Elizabeth.

Next Bargaining Date:

June 15
